

ZoneAlarm Extreme Security

MULTI-DEVICE   iOS

ZoneAlarm Extreme Security is the most comprehensive multi-layered security suite on the market that stops the most sophisticated viruses and hackers. It's the ultimate solution for your digital security – with the world's most powerful firewall and Anti-Ransomware, every device is 100% protected.

Antivirus and Anti-Spyware

Up-to-date antivirus detects and removes viruses, Trojan horses, worms, bots and rootkits.

Identity Protection

Alerts you of any unauthorized change to your credit files.

Advanced Firewall

Monitors every program for suspicious behavior – detecting and preventing unknown attacks that traditional antivirus protection can't catch.

Two-Way Firewall

Makes your PC invisible to hackers, and stops spyware from exposing your data to the internet.

Anti-Phishing

Protects your device(s) in real-time from new and unknown phishing sites; using static, heuristic and machine learning techniques.

Anti-Keylogger

Prevents identity thieves from seeing your passwords and other keystrokes.

Anti-Ransomware

Detects, blocks and removes ransomware attacks and restoring encrypted files by employing behavior-based technologies that don't rely on signature updates. Delivering the expert-level Check Point technology to your business.

Mobile Security

Detects malware, malicious apps and unsecured network; Stops phishing, spyware and bots from abusing device camera and microphone

Real-Time Cloud Security

Checks files against an always up-to-date cloud database of antivirus signatures.

Threat Emulation

Protects against zero-day attacks and undiscovered threats hidden in email attachments and Web downloads.

Threat Extraction

Downloads files confidently and securely, eliminating possibilities of malicious attachments and behaviors

Technical Support

Free customer support, including in-depth information, forums and 24/7 Live Chat.

System Requirements

Microsoft® Windows® 7, 8, 10 All versions

32-bit / 64-bit, 2 GB RAM
2 GHz or faster processor
1.5GB of available hard-disk space

Microsoft .NET framework

Version 3.5 or later
Note: If a supported Microsoft .NET Framework is not installed, it will be installed with ZoneAlarm 2019

Compatibility

ZoneAlarm 2019 is only compatible with MS Windows Defender, and is not compatible with any other anti-malware software. To install ZoneAlarm 2019, you must first uninstall other anti-malware software installed on your device. Otherwise, you may experience OS instability and computer performance issues.

Anti-Phishing Add-on

Google® Chrome all versions

ZoneAlarm Mobile Security App

iOS 9.0 or newer
Android 4.2 or newer

www.zonealarm.com

Same technology used to protect Fortune 500 companies and home PC users.

ANTIVIRUS & FIREWALL

Antivirus & Anti-Spyware Engine

Detects and removes viruses, spyware, Trojan horses, worms, bots and more. Independently tested to provide superior protection.

- Kernel-Level Virus Prevention protects the operating system.
- Scan Modes let you customize your protection.
- Fastest-Updating Signature List detects and stops the most recent viruses that others miss.

Advanced Real-Time Antivirus

Provides access to the up-to-date database of Antivirus signatures to protect against newly emerging threats. Real-Time Cloud Database contains up-to-date reputation of files, web resources and software enhancing traditional Antivirus + Firewall protection.

- Checks files against Real-time Cloud database to ensure that even the latest threats are not missed.
- Contains the latest Antivirus signatures, web resources and software to ensure up-to-date protection.

Two-way Firewall

Stops Internet attacks at the front door and even catches thieves on their way out. Our two-way firewall proactively protects against inbound and outbound attacks while making you invisible to hackers.

- Threat Traffic is monitored and blocked – inbound and outbound.
- Full Stealth Mode makes you invisible to hackers.
- Kill Controls instantly disable malicious programs.

Advanced Firewall

No product is 100% effective against viruses or spyware. ZoneAlarm's advanced firewall monitors behaviors within your computer to spot and stop even the most sophisticated new attacks that bypass traditional antivirus and security suites.

- OSFirewall™ Monitors programs for suspicious behavior – spotting and stopping new attacks that bypass traditional anti-virus protection.
- Advanced-access Protection targets and defeats new, advanced attacks that other firewalls miss, such as raw data access, timing, and SCM and COM attacks.
- Zero-hour Protection prevents silent outbreaks from gaining system access – before other security programs can even detect the threat.
- Application Control uniquely shields your operating system during start-up, before most security products have even loaded.
- Early Boot Protection uniquely shields your operating system during start-up, before most security products have even loaded.

Threat Emulation

For any file you select, Threat Emulation protects against undiscovered threats by examining suspicious files in the cloud using four steps:

- Inspect – Email attachments and web downloads in MS Office, Adobe PDF and Zip formats are analyzed to see if they are safe or malicious based on known threats.
- Emulate – Suspicious files are uploaded to the cloud and opened in a virtual sandbox to check for abnormal behavior typical of malware.
- Prevent – If a file is determined to be malicious, you are alerted to delete it before it can infect your PC.
- Share – The Threat Emulation cloud database is updated with the new signatures preventing others from being infected.

Additional Layers

Multiple layers of advanced protection provide unsurpassed security.

- Wireless PC Protection shields you from hackers, identity thieves and other online threats when you connect to an unsecured network.
- Automatic Wireless Network Security detects wireless networks and automatically applies the most secure firewall protection setting.
- DefenseNet™ provides real-time security updates, responds quickly to breaking threats and leverages threat data from millions of users – protecting your PC from the latest attacks.

ANTI-RANSOMWARE

Real-time Behavior Analysis

Uses real-time behavior analysis to detect attacks that antiviruses cannot.

- Keeps you one step ahead of cyber blackmail attacks today.
- Defends you against new variants that may appear in the future.

Protects your PC 24/7

- Easy to deploy and manage, eliminating PC infections, even when your computer is shut down.

Antivirus Compatibility

Compatible with all antiviruses.

- Utilizes an advanced security engine and algorithms.
- Uses a predictive behavior-based approach.
- Identifies and remediates zero-day ransomware.
- Restores any data or files encrypted during an attack, almost immediately.

WEB SECURITY

Threat Extraction

Uses Check Point's Zero-Day Protection to remove potentially malicious features from file downloads. This covers macros, embedded objects, and other malicious content.

Browser Protection

Enhanced Browser Protection scans websites for dangerous scripts, files, archives and packed executables before they are downloaded onto the end-users' computer, preventing scripts/files from ever saving to disk or executing if they are found to be dangerous.

Anti-Keylogger

Prevents identity thieves from seeing your passwords and other keystrokes.

ONLINE PRIVACY

Private Browsing

Erases your cache and all, cookies, history and passwords – letting you browse the Web in complete privacy.

MOBILITY & DATA

Identity Protection Services

Identity theft can happen to anyone, anywhere. ZoneAlarm delivers superior PC-based protection and exclusive data encryption, and also offers offline identity-protection services.

- Daily Credit Monitoring and Fraud Alerts include daily credit reports with email alerts. You'll be notified of any changes in your credit reports – which are often an indication of identity theft (US only).
- Victim Recovery Service provides free telephone counseling to guide identity-theft victims through resolution and recovery (US only).

MOBILE SECURITY

WiFi Protection

- Secures your device from fake Wi-Fi hotspots around you.
- Ranks the networks for your safety so that your credentials won't be compromised.

Privacy and Data Security

- Blocks attempts to remotely seize control of your camera, microphone, and more.
- Preserves your most precious moments, photos, videos and messages.

Network and Browser Security

- Real-time protection against phishing, spyware and malicious bots.
- On-device Real-time Protection (ONP) scans on every link you click on to make sure it's not directing you to a phishing site.
- Privacy and personal data can never be compromised.

SUPPORT

- Free upgrades for 12 months. You'll be notified automatically when a free new version is available.
- Free customer support includes in-depth information, forums and online LiveChat 24/7.
- 30-day guarantee: Satisfaction guaranteed or you'll get your money back.
